IQ-Pass

The IQ-Pass mobile access control units are patented access control solutions for individuals and vehicles. IQ-Pass develops, manufactures & supports innovative solutions for construction, industry, security and events. The IQ-Pass product range is based on the combination of rapid deployment – ‘Plug & Play’ installation – with heavy-duty construction, advanced access control systems and time registration software.

IQ-Pass Car Gate

The IQ-Pass Car Gate is an integrated solution for site security, access control and time & vehicle registration. The IQ-Pass Car Gate has been specifically developed to provide a mobile, heavy-duty & sophisticated solution for temporary vehicle access in construction, industry and at events.

The IQ-Pass Car Gate provides a professional site access, with advanced access control system only permitting access for registered visitors. The IQ-Pass Car Gate can be operated by mobile-phone, remote control, internet or smart-card. The IQ-Pass Car Gate can be integrated into existing access control systems, the IQ-Pass Control Gate or as a stand-alone vehicle barrier.

The combination of IQ-Pass Car Gate and IQ-Pass Control Gate provides optimal vehicle and personnel access control.
